

PFAFF[®] Industrial

New

Maximum Quality | Highest Productivity

8323

Hot-air welding machine for process reliable welding of reflective strips on work, sports, protective and safety wear

Modern method for applying reflex strips in highest quality

Up to 70% time savings compared to conventional processing

Lengths are exactly programmable – programming of single segments
and complete sequences are possible

Flush start and stop of strips

Tape cutter for straight and even cuts

Programs and parameters may be transferred to other machines in the
production process
